

GLOBAL GREEN TSUNAMI

Presentation by:

Kevin Hydes
Chair of the World Green
Building Council

Wednesday, November 21, 2007
4:00 p.m. (Free admission)
Alumni Theatre – Clock Tower

“The global green tsunami”

Green building initiatives are rapidly gaining global momentum as pressure from the public, government, institutions and industry continues to swell and sweep across the building industry and our communities.

Join us for a discussion on how we can participate in our local community to transform the built environment. Kevin, Chair of the World Green Building Council, is a founder and director of the Canada Green Building Council. He is Vice President of Buildings Engineering and Sector Leader for Sustainable Design at Stantec, a leading international design and consulting firm. His vision led to the first LEED® Gold Certified project in Canada, the first LEED-EB Gold Certified project in North America, and the successful completion of 20 LEED Certified projects. Kevin is an Honorary Member of the Royal Architectural Institute of Canada and the Architectural Institute of BC, an Adjunct Professor at McGill University School of Architecture, and the Liaison Officer for the Association of Consulting Engineers of Canada and the CaGBC.
