BUILD IT LEED FOR CONTRACTORS

The Cascadia Region Green Building Council presents a complete, step-by-step process for managing the construction of Leadership in Energy and Environmental Design (LEED) Rating System projects from preconstruction to documentation. Designed for construction managers, general contractors, subcontractors, construction companies, and builders, this training will get you and your company ready to implement LEED on your next project, including preparation of the LEED documentation required from contractors.

AT THIS TRAINING YOU WILL:

- Understand why LEED is such a big deal in the construction marketplace.
- Learn the 17 points in the LEED system that every contractor should know.
- Understand the complete management process for constructing a LEED project from preconstruction through documentation.
- Practice planning and documenting key LEED Credit items.
- Master "difficult" points that present a challenge on LEED projects.
