

LEED® Canada-NC (New Construction) 1.0 Technical Review Workshop

Vancouver – Wednesday, June 25th, 2008

The Westin Bayshore – 1606 Bayshore Drive, Vancouver

LEED® Canada-NC 1.0 for new construction (LEED-NC) is a comprehensive, voluntary, market-driven green building rating system. It evaluates performance on a range of ecological and human health issues from a whole building perspective, providing a definitive benchmark for what constitutes 'a green building.'

LEED-NC recognizes buildings that incorporate design, construction and operational practices that combine healthy, high quality and high-performance systems and materials with reduced environmental impacts. Understanding LEED-NC is an important step towards reducing environmental impacts and achieving superior economic performance in buildings. This intensive, one-day workshop provides a technical overview of the LEED Canada-NC 1.0.

What will you learn?

- o An understanding of green-building design benefits and strategies.
- o Knowledge of how and when to use the LEED
- o Canada-NC 1.0 green building rating system.
- o Information about green building resources to use in your projects.
- o New skills and insights for leveraging green design and LEED into your practice
- o Ability to reposition and differentiate yourself in the marketplace.
- o Solid introduction for continued self-study in preparation for the LEED® Accreditation exam (exam is offered separately from the workshops)

Who should attend?

- Architects
- Engineers
- Builders / Contractors
- Project Managers
- Facility Managers
- Product manufacturers
- Real estate managers, owners & tenants
- Consultants & industry stakeholders
- Interior Designers
