

LEED for Homes Program Review

Are you ready to enter the rapidly growing green building market?

Attend the LEED® for Homes Program Review presented by the U.S. Green Building Council. Gain the knowledge needed for successful participation in the LEED for Homes initiative.

WHY LEARN ABOUT LEED?

LEED for Homes is a voluntary rating system that promotes the design and construction of high performance "green" homes. A green home uses less energy, water, and natural resources; creates less waste; and is healthier and more comfortable for the occupants. Benefits of a LEED home include lower energy and water bills; reduced greenhouse gas emissions; and less exposure to mold, mildew and other indoor toxins. LEED certification recognizes and rewards builders for meeting the highest performance standards, and gives homeowners confidence that their home is durable, healthy, and environmentally friendly

WHO SHOULD ATTEND?

Industry professionals seeking to increase their understanding of the LEED for Homes Rating System and green building strategies, benefits and resources:

- Builders
- Designers
- Consultants

WHAT'S COVERED

- Credit requirements of the LEED for Homes Rating System
