## VLUG Interactive Forum

**Friday May 30<sup>th</sup> @ noon**  
**Georgia Room @ the Terasen Gas Building**  
**1111 Georgia Street**

Topic: "Getting started in Building Performance Evaluation"

Do you secretly wonder whether your building design is truly delivering energy/emissions efficiency and occupant satisfaction?

Have the courage to find out! Learn how to use the public domain "Ecosmart Building Performance Evaluation Protocol" to get the feedback you need about your completed building projects. Then go on to greatness as a designer.

Get your questions answered about how to plan, fund, carry out and learn from a Building Performance Evaluation. The topic will be introduced by Rosamund Hyde, PhD, P.Eng.

Preview the Ecosmart Building Performance Evaluation Protocol and six building performance evaluation reports at [www.ecosmart.ca](http://www.ecosmart.ca)

# VANCOUVER LEED USERS GROUP

Lunch will be provided. Cost for attendance:

\$10 in advance / \$20 at door Cascadia members, EGB, students

---

\$15 in advance / \$25 at door CaGBC or USGBC members

---

\$25 in advance / \$35 at door Non-members

---

Bio for Dr. Hyde:

Rosamund Hyde, Ph.D., P.Eng., is a Senior Research Engineer at Stantec Consulting Ltd., where she is involved with funding for research and innovation. In her previous capacity of Sustainable Building Researcher, she worked for 5 years on developing, applying and learning from building evaluation protocols. Her work has been presented at Greenbuild (Austin 2002 and Chicago 2007) and reported in Architectural Record (February 2008). Her career focuses on facilitating progressive cycles of education, innovation and evaluation to help accelerate a transition to a sustainable relationship between humans and technology. She is presently serving on the Canadian Engineering Accreditation Board, (a committee of Engineers Canada), and on the Environmental Unit of the Anglican Diocese of New Westminster. Dr. Hyde is married with two school-age children; the family has been car-free since 1999.
