

Eugene Branch/Cascadia November 2008 Meeting

Cascadia Branch meetings are an opportunity to learn and share information and ideas on green building and sustainable design, and foster interaction in the design community. Meetings are the second Tuesday of each month. If there are topics you would like to hear more about or share, please contact us.

Cascadia meetings are free and open to the public.

CASCADIA REGION GREEN BUILDING
COUNCIL/EUGENE BRANCH

Monday, November 10, 2008

Noon- 1:00 p.m.

Tykeson Room

Eugene Public Library

Eugene, Oregon

**For more information contact:
Scott Stolarczyk, AIA, LEED AP

Embodied Energy

This presentation will provide an overview of the tools that architects and engineers can use to evaluate the life cycle environmental footprints of a building and its components. These tools include Carbon Accounting, Environmental Life Cycle Assessment, Ecological Footprint and others. Focus will be on the approaches and available tools that are most efficiently incorporated into the daily practice of architects and engineers, and will help answer clients increasing desire to minimize all environmental impacts on a life cycle-wide basis, especially greenhouse gases.

Our presenter this month is Peter Reppe. Before "re-starting" his career as an energy analyst and sustainability specialist at SOLARC in 2004, Peter acquired in-depth experience with Life Cycle Assessment as Research Associate at the University of Michigan. His current work spans a wide range of green building aspects, including energy analysis, LEED planning and administration, energy efficiency design support for architects and engineers, environmental impact evaluation of materials, and support in materials selection to architects.

Please RSVP to eugene@cascadiagbc.org, or contact Scott at 342-8077.
