PRESENTERS

Luis Damy | High Performance Building Program Manager | BC Hydro

Luis is the Program Manager for the High Performance Building Program at BC Hydro Power Smart. Luis has over 12 years experience in process re-engineering, project management and product development/implementation. Prior to BC Hydro, Luis was a senior project manager at IBM and most recently with TELUS Business Solutions. He holds an MBA from the University of British Columbia specializing in Strategic Management, a Master's Degree in Industrial Engineering and a Bachelor's Degree in Mechanical and Electrical Engineering.

Tom Owen | Systems Engineer | Small Energy Group

Tom's current work focuses on helping clients identify opportunities for energy management and implementing infrastructure for energy management on client sites. He has worked with clients ranging from a government ministry to Hartley Bay, a remote, off-grid community of 160 people on BC's north coast.

Small Energy Group is a Vancouver based software company that makes web-based energy management software for commercial and institutional buildings.
