

# Integrated Design Process: An Introduction to the IDP

**Vancouver-Thursday, October 15<sup>th</sup>, 2008 8am-12pm**  
Granville Island Hotel-1253 Johnston St, Vancouver, BC

This ½ day workshop has been designed for people who will be participants in the IDP and want to improve their skills and ability to understand, effectively participate in and contribute to this process. It will also assist project team members to make the case for IDP to their clients and colleagues.

The workshop provides an introduction to the integrated design process, both in theory and in practice. The workshop explores the differences between IDP and conventional design, and how IDP can result in more cost effective, efficient, integrated and elegant projects. We will look at how the traditional project management process needs to shift and adapt to enable IDP, and also how the roles and responsibilities of project team members are delineated in IDP.

The workshop will draw on the experiences of participants to explore the range of ways that IDP is used in practice, and the successes and challenges associated with different applications. It will also provide participants with the opportunity to learn and practice some basic skills fundamental to effective participation in IDP.

It is anticipated that participants will be a mix of planners, designers, owners, operators, educators in the design and planning fields, and community members interested in design.

## What will you learn?

- What is IDP? And how it differs from the traditional design process
- How to modify the scope of work, project schedule and project budget to support effective IDP within limited and fixed fees
- The value of interdisciplinary collaboration and the role participants need to play in an IDP process to maintain integration and support optimization throughout the design decision making process
- Tools and strategies to improve “self-facilitation”, active listening, respectful dialogue and decision making
- Strategies discussed in the “Roadmap to the Integrated Design Process”

## Who should attend?

- Designers
- Consultants
- Owners
- Municipal and Government Staff
- Facility Managers
- Educators

## Registration Fees

CaGBC Members	\$185 + GST
Non-Members	\$225 + GST

*Building with purpose*
