

LEARN, SHARE, GROW

VANCOUVER | 10.31.08

LEED® User Group October Meeting

Learn from peers, share your experiences and grow your understanding of green building practice in British Columbia.

This month's topic:

Greening Without a Certification:
Alternative Forms of Ownership and Design

- Structural engineering non-typical buildings
- Organization and make up of a Eco Village
- Organization of a Co-operative Ownership Model
- Collaborative decision making
- 15 minutes of LEED Users "clinic"

Presentations will set the framework for an often overlooked topic of green design and facilitate both a technical and philosophical discussion on the matter.

What are the missing metrics for green certification?

The session will be followed by an open clinic for those with technical LEED questions.

FRIDAY OCTOBER 31 NOON TO 1 P.M.

Terasen Gas Building, Georgia Room, 1100 Georgia Street

Lunch will be served. Check-in begins at 11:50 AM

To register, visit <http://leedapexmpreppdx111308.eventbrite.com/> or click the leaf.

REGISTRATION

	early rate (ends 10.30.08)	regular rate
Cascadia & CaGBC Members	\$10	\$20
Non-member	\$25	\$35
Students	\$10	\$20

PRESENTERS

Mark Porter | LEED AP, PE | Associated Engineering

Mark will share his work in designing the structure of a cordwood building for the Yarrow EcoVillage and describe the make up of this unique project.

Michael Driedger | LEED AP, B.A., DipT | Busby Perkins+Will

As a sustainable research advisor, Michael deals with technical green building issues on a day to day basis but when he goes home, he lives in a non typical co-operatively owned building. He will explore the notion of co-operative ownership and talk about the greenness of collaborative decision making.
