

WASHINGTON WORKSHOPS

YOU WILL LEARN:

- What IDP is, and how it differs from the traditional design process;
- How to modify the scope of work, project schedule and project budget to support effective IDP within limited and fixed fees;
- How to carry a set of building performance goals throughout the project to building occupancy and operation, especially LEED goals;
- The value of interdisciplinary collaboration and the role participants need to play in an IDP process to maintain integration and support optimization throughout the design decision making process;
- Tools and strategies to improve “self-facilitation”, active listening, respectful dialogue and decision making; and
- Strategies discussed in the “Roadmap to the Integrated Design Process.”

PRESENTED IN PARTNERSHIP WITH

BETTERBRICKS
Bottom line thinking on energy.

AN INTRODUCTION TO THE INTEGRATED DESIGN PROCESS AND DESIGN SYNERGIES

Gain the tools and techniques to actively participate in collaborative project decision-making – a necessary element for creating cost-effective and environmentally sound buildings. The Integrated Design Process is a new model for team communication and information sharing that maximizes design goals and benefits, while minimizing project cost and impact.

This workshop provides an introduction to the integrated design process, both in theory and in practice. We will look at how the traditional project management process needs to shift and adapt to enable IDP, and also at how the roles and responsibilities of project team members are delineated in IDP.

Integral to achieving successful sustainable building projects, this training is essential for all building industry professionals – from designer to owner.

DESIGN SYNERGIES is a 1 hour seminar that will address how integrated design synthesizes climate, use, loads and systems to deliver a more comfortable, productive and energy-efficient environment, while meeting project requirements and budget.

WHO SHOULD ATTEND

All professionals who impact a building’s potential in any phase: from conceptual design to design documents, and from construction to occupancy.

Check-in begins at 7:30am, workshop is from 8:00am-noon. Lunch/seminar is from noon-2:00pm.

4 AIA CEUs available

REGISTRATION (note, the early rate applies until two weeks prior to each event)

IDP WORKSHOP + SEMINAR

	early rate	regular rate
Cascadia members	\$150	\$200
Non-members	\$175	\$225
Full-time Students	\$75 (limited availability)	

SEMINAR ONLY

	early rate	regular rate
Cascadia members	\$25	\$35
Non-members	\$30	\$40
Full-time students	\$15 (limited availability)
