

ALASKA WORKSHOP

UNDERSTAND AND
IMPLEMENT ONE OF
THE TENETS OF
GREEN BUILDING

AN INTRODUCTION TO THE INTEGRATED DESIGN PROCESS

Gain the tools and techniques to actively participate in collaborative project decision-making - a necessary element for creating cost-effective and environmentally sound buildings. The Integrated Design Process is a new model for team communication and information sharing that maximizes design goals and benefits, while minimizing project cost and impact. Integral to achieving successful sustainable building projects, this training is essential for all building industry professionals - from designer to owner.

WHO SHOULD ATTEND

All professionals who impact a building's potential in any phase: from conceptual design to design documents, and from construction and occupancy.

Check-in begins at 7:30am, workshop is from 8:00am-noon
