About the LEED buildings:

The Inkwel is a 4 story commercial building, expected to achieve Gold certification for Core & Shell. It uses an open loop ground-coupled heat pump, on-site storm water management, water-efficient fixtures and landscaping, daylighting, low-VOC materials, FSC wood, construction waste management, and other features.

The Arlie & Co. Office is expected to achieve LEED Platinum certification for Commercial Interiors. Located in the Inkwel, it shares the same green strategies. It uses extensive controls for daylighting and ventilation, and an array of products and finishes made from recycled materials, renewable resources, regionally sourced materials, FSC wood, and low-VOC products. Rowell Brokaw Architects is managing the LEED certification process for both buildings.

Please bike, carpool or take a bus. Directions from downtown Eugene:
