COMPOSTING TOILETS AND GREYWATER SYSTEMS

PRESENTER

Don Mills of Clivus Multrum

Clivus Multrum is a pioneering supplier of composting toilet and greywater systems in North America and beyond. For more than 30 years, our systems have been protecting the environment in parks, nature centers, commercial buildings and homes worldwide. Don's presentation will include:

- Background on water pollution issues and conventional waste treatment technologies
- Rationale for use of composting toilets and greywater systems
- Description of composting toilet processes
- Design requirements for composting toilets
- Maintenance requirements for composting toilets
- Greywater irrigation systems process and design
- Examples of composting toilet and greywater systems in green buildings
