Green Building Services, Inc. is an employee-owned multi-disciplinary sustainability consulting firm with locations in Portland, Sacramento, Houston and Orlando. GBS has managed the successful certification of over 150 LEED certified projects to date.

Green Building Services, Inc. (GBS) Presents:

Greening your Portfolio: Exploring the Volume Approach to LEED for Existing Buildings: Operations & Maintenance (LEED-EB:O&M)

Presented by industry experts:

Elaine Aye, IIDA, LEED AP (EB,NC, CI), USGBC Faculty Member

As Principal at GBS, Elaine oversees all Existing Buildings: Operations & Maintenance and Commercial Interiors projects. Under her direction, her team has managed several of the first LEED-EB and LEED-EB:O&M projects and several LEED Platinum buildings. Elaine developed, in collaboration with the Zero Waste Alliance, a curriculum for integrating the LEED-EB framework into environmental management systems. Elaine codveloped the training module for LEED for Products Manufacturers. As a member of the USGBC Training Faculty, Elaine is a frequent speaker at national building conferences including GreenBuild, NeoCon, and IFMA World Workplace.

Brad Harrison, LEED AP, GBS Project Manager

Brad manages Existing Buildings and Commercial Interiors projects at GBS. Brad has a Bachelor of Science in Applied Economics from Cornell. He has managed a LEED volume certification for a portfolio of office buildings and individual certifications for a mixed-use development, a large convention center, manufacturing facilities, a hospital, and retail spaces. Brad is a member of the Cascadia Regional Green Building Council, Emerging Green Builders and the Oregon Natural Step Network.

Volume certification is a program that can provide a cost-effective streamlined path to achieving LEED certification on multiple buildings.

This 60 minute webinar provides insight into the process, strategies, and tools of the USGBC's LEED-EB:O&M Volume certification program.

Learn from experienced professionals that have applied LEED certification on a number of volume projects, including the first EB-certified Volume project in the country. Building portfolio certification adds credibility and assurance to your portfolio-scale enhancement efforts.
