

The TRANSFORMATIONAL LECTURE SERIES aims to inspire all building industry professionals to embrace their role in creating a sustainable built environment now, as well as ensuring that sustainability becomes integral to all development in the future.

By reminding us why we must act boldly and helping us to imagine a world where sustainability is the baseline, these lectures promise to inspire a revolution!

INSPIRE. MOTIVATE. TRANSFORM.

TRANSFORMATIONAL LECTURE SERIES

DESIGN FOR ON-SITE RESOURCES

Dr. John Reynolds, FAIA

Rather than import all of the energy used for a building, on-site resources can make substantial contributions. For more than 40 years John Reynolds has investigated how people use energy in buildings, and how buildings shape that energy usage. He will talk about buildings in many climate zones that reduce imported energy by using sunlight, breeze and ventilation, cooling with nighttime outdoor air, the very cold sky, and temperatures below the ground. The results are beautiful buildings that are a pleasure to use.

**09.16.09 – Anchorage, AK – Anchorage Museum of History and Art
625 C Street, Anchorage**

Lecture starts at 7:30pm; doors open at 7:00pm.
