

The 2010 TRANSFORMATIONAL LECTURE SERIES aims to inspire all building industry professionals to embrace their role in creating a sustainable built environment now, as well as ensuring that sustainability becomes integral to all development in the future.

The 2010 TLS in Oregon features local heroes from the Pacific Northwest who will address the enormous challenges confronting the region and the importance of moving to a more self-sufficient economy for a secure and sustainable future.

COMPACT URBAN SPACES

Shifting the paradigms of traditional design

Kevin Cavanaugh, Designer/Developer, Cavanaugh & Cavanaugh, LLC

When Kevin Cavanaugh completed his Loeb Fellowship at Harvard University Graduate School of Design in 2008, he focused his studies on urban planning, and, more specifically, the regulatory framework that tends to dampen innovative ideas. Kevin's design efforts in Portland are a prime example of bringing groundbreaking urban designs to life. He has overseen the design, development and management of several projects, including Burnside Rocket (1111 E. Burnside Street), a LEED Platinum, mixed-use building which features ground source heat pumps that use the earth's constant temperature to thermally condition air before entering the building. Now, Kevin has expanded his focus to explore how innovative, compact urban projects can be done without reliance on bank loans. He is currently leading a team of fourteen architects, each designing his/her own "parcel" at 14 Parcels (SW Water Avenue and SW Arthur Street), a truly unique residential project both in terms of design and size. With his work throughout Portland, Kevin continues to shift the current paradigms of urban design.

**02.04.10 – Bend, OR – Auditorium at Central Oregon Community College
2600 N.W. College Way Bend, Oregon 97701**

Lecture starts at 5:30pm; doors open at 5:00pm.

COST

Cascadia members: Free.

Non-members: \$10

Full-time students: Free

Don't forget to bring your Cascadia passport to receive a stamp!
