

SEEKING SUSTAINABLE SYSTEMS: a series of conversations with local experts

Co-sponsored by: *Center for Creative Change at Antioch University Seattle* | *Bainbridge Graduate Institute* | *Portfolio 21* | *SVP Seattle*

seminar series time & location

TIME: Reception 5:30–6:30 p.m.

Program 6:30–8:30 p.m.

Post seminar networking 8:30–9:00 p.m.

LOCATION: Downstairs at Town Hall on
Eighth and Seneca in Seattle
(1119 Eighth Avenue)

a conversation about a green economy

with **Joel Magnuson and Michelle Long**

TUESDAY, MAY 11, 2010

The terms green economy and green jobs are often used, but what do they really mean? What does a truly green economy look like at local and national levels? Can local changes catalyze large scale change? How do we reconcile the demand for economic growth with the goal of sustainability?

Join **JOEL MAGNUSON**, internationally recognized economics professor and author of "Mindful Economics" and the forthcoming book, "Beyond Destruction", and **MICHELLE LONG**, Executive Director of Business Alliance for Local Living Economies (BALLE), a network of over 21,000 socially responsible businesses across the U.S. and Canada, as they discuss these important issues.

a conversation about our food and eating

with **Mary Embleton and Britt Yamamoto**

WEDNESDAY, JUNE 9, 2010

Choosing and eating food is a significant personal activity that is common to all of us. The various ways that food is produced, distributed, regulated, marketed and consumed have profound cultural, environmental, economic, political, health and social implications. Is it enough to "vote with your fork"? What would a sustainable food system look like?

Join us as **MARY EMBLETON**, Executive Director of Cascade Harvest Coalition, and **BRITT YAMAMOTO**, Core Faculty at the Center for Creative Change at Antioch University, discuss the many dimensions of food and eating.

a conversation about sustainable design

with **Ash Awad and Daniel Friedman**

TUESDAY, SEPTEMBER 14, 2010

Design plays a pivotal role in the sustainability of our buildings, communities and products, as well as the systems we use to handle transportation, energy and water. Can we change our perspective on the built environment from "projects that are created and finished" to a more sustainable one of "systems that perform over time"?

Join us as **ASH AWAD**, Vice President of Energy & Facility Services at McKinstry and **DANIEL FRIEDMAN**, Dean of the College of Built Environments at the University of Washington explore sustainable design and its impact on our future.

pricing & advanced tickets

\$10 Advanced tickets available online
until one day prior to event

\$15 Admission at the door (cash or check)

\$30 Bundle Pack—Save money by
registering for all three events by May 10th

\$5 Student price—At the door
with current student I.D.
