

## Job Announcement

**Job Title:** Sustainability Project Manager

**Date:** July 9, 2010

Sellen Sustainability, LLC and Sellen Construction Company are seeking to fill the position of Sustainability Project Manager. The Sustainability Project Manager is truly a “consultant”: a leader and a facilitator of sustainability goal setting and execution for project teams from pre-construction through construction. The Sustainability PM will bring a passion for sustainable design and construction and a solid working knowledge of construction practices, architectural design and sustainability protocols to guide those elements – both LEED and non-LEED – on sustainability projects

The position requires a person with a strong personal commitment to and a well-defined vision for sustainability from a design and construction context. The successful candidate will have a strong knowledge and understanding of construction concepts and methods and how sustainable practices apply to those operations and activities and will bring experience with and understanding of LEED, GBCI program processes and the protocols associated with projects seeking LEED certifications (NC, CI, CS, Schools, EB O&M, etc.).

The ideal candidate will have at least five years of applicable work experience and a bachelor’s degree in Architecture, Engineering, Environmental Science, Construction Management or similar degree, or a comparable combination of education and experience. The Sustainability Project Manager must be highly organized, efficient, and resourceful and must be a gifted communicator, both verbally and in writing.

If you have these qualifications and strong leadership and organization skills, please submit your electronic resume and application to [Mark.Summers@sellen.com](mailto:Mark.Summers@sellen.com).

*Sellen Construction Company and Sellen Sustainability, LLC. are equal opportunity employers.*
