

NATURAL SYSTEMS INTERNATIONAL

...leaders in applied biotechnology - wastewater, stormwater, reuse, watershed restoration...

Project Engineer (EIT or PE)

Santa Fe, New Mexico

Position Start Date: Immediately (flexible)

Resumes Accepted: Until position filled

Natural Systems International (NSI) is an engineering consulting firm specializing in water supply, wastewater, stormwater, and reuse systems. Our specialties include the design of 'green' infrastructure based on the use of natural systems. Based in Santa Fe, New Mexico, NSI has been designing natural water infrastructure systems for over 20 years. We offer an innovative, team-oriented work environment and competitive benefits. Visit our website for more firm information and to view samples of our work.

Position Description

NSI seeks a qualified individual to work collaboratively on engineering and design projects in United States and abroad. Ideal candidate will assist with development and management of projects in Central and South America. The ideal candidate would possess the following:

- Undergraduate or Graduate Degree (Environmental, Civil, Agricultural or related Engineering department); some field experience preferred,
- 3-10 years experience with civil engineering projects, including: water supply, stormwater, wastewater, water reuse, and/or other basic civil engineering services, and
- Fluency in English and Spanish (written and verbal) is **required**; proficiency in other languages would be considered an additional benefit.

Tasks will include office-based work with the engineering and design teams. Work includes completing calculations and design work related to water infrastructure planning and construction projects including wastewater, stormwater, reuse, and land applications systems.

Experience in the following areas would be considered a bonus in candidate selection:

- HEC RAS, HydroCAD, StormCAD and/or other environment / hydrology software
- GIS and/or Land Development software,
- 3-D design capability (Sketch-Up, Revit, etc.),
- client coordination and relationship building,
- engineering and specification coordination with engineering staff,
- design coordination with CAD staff,
- assisting with construction oversight and administration,
- assisting in project oversight and planning,
- cost estimating,
- utility rate studies and feasibility studies, and/or
- system evaluation.

Possibility of helping to open a permanent NSI office on the East Coast, West Coast, or Central America (Panama).
