

Do you love your job? We do.

Project Associate Position Open

If you are looking for fulfilling, fast-paced, flexible and fun work in the green building field it is time to join the O'Brien & Company Team

Position features:

- Working for a leading firm in this growing, cutting-edge field with projects around the Northwest and the country.
- Cool new daylight offices in an historic downtown building Seattle, designed to receive LEED CI Certification.
- Working directly on projects with leading owners, developers, and architects in green building in the Northwest.
- Facilitation of green building policies and program development for local, regional, and state governments and non-profits around the country.
- Opportunities to develop and teach educational classes and to attend many educational events yourself.
- A flexible work environment based on respect.
- Medical, retirement, paid time off, and commuting benefits.

Required Experience and Skills

- Two or more years experience in project management in green building or conventional design, construction, real estate or related fields.
- Training/experience in sustainable design and construction, with a high level of proficiency in one or more technical areas.
- LEED Accredited Professional and LEED project experience.
- Degree or work experience in design, engineering, construction or related field.
- Excellent writing and verbal skills, including a high comfort level presenting to and working with owners, designers and contrac contractors.
- Self-starter who can both lead and work as a team.

Green Project Consulting

- We team with owners, design professionals, and contractors to oversee both the process and practice of green building and help create a successful, award-winning projects.

Green Building Programs

- Green building programs are an important tool in developing a marketplace for green design. We work with industry associations, municipalities, environmental groups, and businesses across the country to develop programs that are effective at mainstreaming sustainable building practices.

Sustainable Development Training Institute (SDTI)

- Our Sustainable Development Training Institute is designed to empower participants to apply sustainable principles intelligently and thoughtfully, using the best information currently available. Unique and interactive programs, tailored to the audience, are our signature.

Research & Policy

- The foundation of informed sustainable development is solid research, rigorous analysis and the development of sound environmental policy. O'Brien & Company conducts research and analysis on a variety of topics that support sustainable development of our built environment.

Visitors tour the Puget Sound Energy Built Green Idea Home, guided by O'Brien & Company staff. O'Brien & Company provides Energy Star and Built Green Consulting and Verification, and is consulting to over 100 units of LEED for Homes Pilot projects

O'Brien & Company focuses on informed sustainable development practices to build community across all market sectors and all types of stakeholders. From schools to multi-family, from labs to high-rises, we've got our finger in it all.

Come visit us at our new downtown office in the historic Colman Building. Features include daylighting and views from every seat, bike room and shower, operable windows, and easy access to all types of transportation

O'Brien & Company

O'Brien & Company is a nationally recognized leader in sustainable design and construction consulting, education, and research. The company's mission is to promote the informed, sustainable development of our built environment. Our goal is to make the widespread adoption of sustainable construction and development principles a reality. We believe sustainably designed buildings and communities make the highest, best use of natural resources, and promote the vitality of human and economic resources.

To achieve our goal, O'Brien & Company provides technical and educational support to the design and construction industry, to policy-makers affecting construction and development, and to the public. Forward-thinking clients use us to do what we do best: discern, translate, and facilitate the complex choices they face when incorporating sustainable principles into their buildings and communities.
