

## Redefining What it Means to be an Engineer

**Call for Presenters**

Cascadia, in conjunction with our conference partners, is seeking presentation proposals for our annual fall conference **engineeringgreen07**. As the premier event for integrating green practices into all types of engineering – from the site to the systems, we are seeking experts from the realms of civil, electrical, structural and mechanical engineering to facilitate technical trainings. The goal of the event is to not only equip participants with sufficient technical knowledge of green engineering practices, but also to provide them with the knowledge and empowerment to integrate those practices into the holistic design process.

The conference will be held in Portland, OR on September 25<sup>th</sup>-26<sup>th</sup> and in Seattle, WA on a to-be-determined date in the fall. Both venues are expecting 250 attendees, who will come from the engineering, architecture, and development spheres.

If you are interested in sharing your green engineering expertise, please submit an abstract of no more than 500 words on a two- to four-hour technical training to Jenny Seifert at [intern@cascadiagbc.org](mailto:intern@cascadiagbc.org) by August 6<sup>th</sup>. The abstract should include:

- Title
- Topic Area
- Presenter Name(s) and contact information
- Presenter bio(s), including past teaching/facilitation experience
- Learning Objectives
- Target audience
- Duration
- Teaching Format
- Potential Partner Organization/Affiliation
- Location (Seattle, Portland or both)

Proposals will be evaluated on the basis of presenter qualifications, regional relevance, and the ability of the technical content to reflect best practices in green engineering.

This event is open to both bioregional and international experts. For questions, please contact Jenny Seifert at the aforementioned email address. No phone calls please.
