

Using LEED for New Construction on Historic Projects Half-Day Workshop

Are you ready to enter the rapidly growing green building market?

Attend the Using LEED® for New Construction on Historic Projects Half-Day Workshop presented by the U.S. Green Building Council. Learn about the adaptive reuse of historic projects and how to minimize the impact on historic resources.

WHY LEARN ABOUT LEED?

Ask any of the 3000 building owners seeking LEED certification right now. Owners and developers are demanding green facilities that save money while protecting the environment, improving health and performance of students, and creating a better learning environment. USGBC's LEED-NC Green Building Rating System™ is the nationally recognized standard for green buildings. LEED is already being used by green building projects in all 50 states and the market continues to grow.

WHO SHOULD ATTEND?

Industry professionals seeking to increase their understanding of the LEED-NC Rating System and green building strategies, benefits and resources:

- Architects
- Engineers
- Owners
- Manufacturers
- Developers
- Designers
- Consultants
- Contractors
- Government Officials

WHAT'S COVERED

- General information on leveraging LEED concepts into historic projects
- How to implement green strategies and modifications necessary for a sustainable design
- Tips for achieving LEED compliance
- LEED project case studies
- Green building costs and benefits
- Available tools and resources
